

MOTOR MOUNT ASSEMBLY - ENGINEERING SPECIFICATION

Part Number: MM-4471-B

Material: 6061-T6 Aluminum Alloy

Torque Specification:

All M8 mounting bolts shall be torqued to 24 Nm +/- 2 Nm using a calibrated torque wrench, applied to the mounting face.

Tolerance:

Bore diameter tolerance is H7. Surface finish on the mounting face shall not exceed Ra 1.6 micrometers.

Fastener retention shall be verified using thread-locking compound Loctite 243 on all mounting bolts.
